

MetroSys Assessment Services

Understand Your Technology Landscape

Assessment Solutions

MetroSys is pleased to present you with our **Assessment Solutions** to help with your assessment needs. MetroSys has helped organizations understand their most critical data globally. We have supported assessments for massive install bases as well as crafted customized assessments tailored to meet organizations needs. We consult with clients to understand key business drivers, organizational goals, provide intuitive discovery and comprehensive assessments providing unbiased consultative feedback to meet your needs.

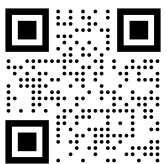

Performance Assessments: MetroSys can review your environment end-to-end and make recommendations to help enhance your applications performance. Whether you need a sniper team to jump in and assist solving a complex issue or just looking to improve overall health, **we can help!**

Virtualization & Compute: Need a holistic view of your virtualized environment? We can assess your current VMware infrastructure including storage, networking and backups. We review your current operations management, monitoring and alerting to help maximize your technology expenditure and minimize disruptions.

Network Assessments: Network troubles? MetroSys can help you identify potential bottlenecks, network design issues or hardware limitations. Our team will review your network topology, route/switch performance, error logs and even assist with general network security to help plan your future state.

Storage Assessments: Assess your storage footprint to understand data trends, performance bottlenecks, aging infrastructure, potential issues, and systems designs.

Migration Assessments: Complex enterprise environments to migrate? We'll show you how. Understand your legacy systems to minimize migration cost and complexity.

Key Benefits

- ▶ Intelligent Data Driven Decisions
- ▶ Unbiased Advisory
- ▶ Understand Complex Environments
- ▶ Develop Actionable Plans
- ▶ Proactive Management
- ▶ Reduced Risk & Unplanned Outages
- ▶ Right Size Technology Investments

Storage

- ▶ Storage Landscape Analysis
- ▶ Data Classification
- ▶ Replication Topology View
- ▶ Best Practices & Issues Management
- ▶ Versioning & Standards Management
- ▶ Storage Performance & Capacity Trending
- ▶ Efficiency & Design Recommendations

Data Migration

- ▶ Legacy Storage Landscape Analysis
- ▶ Data Classification
- ▶ Performance Profiling & Sizing
- ▶ Inhibitor Identification
- ▶ Design Recommendations
- ▶ Migration Strategy

Virtualization & Compute

- ▶ Holistic End-to-end Review
- ▶ vCenter Review & Recommendations
- ▶ Versioning & Standards Management
- ▶ Performance & Capacity Trending
- ▶ Systems Health Checks
- ▶ Review Monitoring & Alerting
- ▶ Backup Architecture

Network

- ▶ Network Topology
- ▶ Bottleneck Identification
- ▶ Best Practices & Issues Management
- ▶ Security Audit
- ▶ Remediation & Design Recommendations
