# Data Mobility
Managing Data Movement

Service Delivery Overview

Managed Migration Services: Just as time is constant, so is need for data mobility as data growth continues to infinitely expand. MetroSys has taken a unique approach to solving complex migrations by implementing a Data Mobility Program. By implementing policies, procedures, automation, & technology, MetroSys simplifies and reduces overall cost of managing complex data migrations in your environment. Why recreate the wheel for every migration?

Data Migrations: Today's customer environments can be complex with both NAS and SAN data spread throughout the enterprise. Each environment can require a different approach. MetroSys consultants have vast experience delivering successful projects in the most seamless & cost effective way. MetroSys can quickly execute migration projects based on our customers requirements leveraging our standardized processes to minimize costly errors. We enable organizations to manage Data Mobility whether it be cross-platform, homogeneously, or a hybrid data fabric as well as service to migrate disparate databases. Whatever your data migration services needs, we can take you there!

Our Expertise

MetroSys has helped some of the largest companies migrate their most **critical** data globally. It's more than just moving the data bits. MetroSys has expertise to provide a vision, define migration strategies, and deliver low impact migration. MetroSys consults with clients to understand key business drivers to prepare for a seamless and cost effective approach to data migrations.

Our keys to our success is our teams' expertise, methodology, and process development to solve some of todays business challenges to **minimize risks, time,** as well as **cost.**

Migration Solutions
- Homogeneous / Heterogeneous Storage
- Hybrid Data Fabric
- Data Center to Data Center
- Disparate Database Conversions

Managed Migration Services
- Data Lifecycle Management
- Standardized Policies & Procedures
- Migration Intelligence & Automation
- Communication Management
- Technology Integration

Migration Assessments
- Evaluate Data Footprints
- Evaluate Operational Readiness
- Identify Inhibitors
- Identify Architecture Landscapes
- Develop Migration Strategies

Migration Preparation
- Comprehensive End-to-end Discovery
- Data Classification
- Migration Mappings
- Architecture Validation
- Migration Launch Sequence Planning
- Project Management

Migration Execution
- Migration Coordination
- Pilot Migrations
- Steady-state Migrations
- Data Validation

Operational Readiness
- Monitoring and Management
- Health Checks
- Post-Migration Support
- Customer Training
