

MetroSys Storage Solutions

Actionable Strategies. Flawless Execution. Optimal Operations.

Our Services

Advanced Consulting: As thought leaders and industry experts, we provide actionable strategies based on your business requirements. Our team understands the bigger picture across the technology stack and tailor solutions coupled with best practices to meet your needs. From on-premises to cloud storage solutions, we can take you there!

Professional Services: Our team of veteran engineers accelerate the implementation and integration of your storage solution. We ensure each solution delivered is deployed in an optimal manner following our standard process to increase quality. In other words, we get it right the first time. We work in concert with storage vendors, resellers and the customer to deliver a best-in-class solution for your business.

Managed Services: Under pressure to solve infrastructure problems instead of focusing the future? No worries. Our team is focused on Operations as a Service (OaaS) which allows management to focus on Service Level Agreements (SLA's) rather than day-to-day management. We can help optimize storage management to decrease costs per gigabyte.

Our Expertise

- **Storage:** NetApp, Pure, EMC, Isilon, HP, 3PAR
- **Migration:** NetApp XCP, NetApp FLI, NetApp 7MTT, Data Dynamics, DataDobi, Parsec Labs, Komprise, Cirrus Data
